

Table of Contents

List of Figures.....	xv
Acknowledgments	xxi
Foreword.....	xxiii
Preface	xxv
CHAPTER 1 Introduction.....	1
Analyzing the social web.....	2
A brief history of the social web	3
Websites discussed.....	4
Tools used.....	5
Exercises	6
CHAPTER 2 Nodes, Edges, and Network Measures	9
Basics of network structure.....	9
Representing networks	13
Adjacency lists.....	13
Adjacency matrix	14
XML and standard formats	16
Basic network structures and properties	17
Subnetworks	17
Paths and connectedness	20
Exercises	21
CHAPTER 3 Network Structure and Measures	25
Describing nodes and edges.....	25
Centrality	26
Describing networks.....	31
Degree distribution.....	31
Density.....	31
Connectivity.....	36
Centralization.....	36
Small worlds.....	38
Exercises	42
CHAPTER 4 Network Visualization.....	45
Graph layout.....	45
Random layout.....	48
Circular layout.....	48

	Grid layout.....	49
	Force-directed layout.....	49
	Yifan Hu layout.....	50
	Harel-Koren fast multiscale layout.....	50
	Other layouts.....	51
	Visualizing network features.....	52
	Labels.....	53
	Size, shape, and color.....	53
	Larger graph properties.....	55
	Scale issues.....	55
	Density.....	56
	Filtering for visual patterns.....	57
	Graph simplification.....	58
	Exercises.....	61
CHAPTER 5	Tie Strength.....	63
	The role of tie strength.....	64
	Measuring tie strength.....	66
	Tie strength and network structure.....	68
	Tie strength and network propagation.....	71
	Exercises.....	72
CHAPTER 6	Trust.....	75
	Defining trust.....	75
	Nuances of trust.....	76
	Development of trust.....	77
	Asymmetry.....	77
	Context and time.....	78
	Measuring trust.....	78
	Propensity to trust.....	78
	Trust in others.....	79
	Trust in social media.....	81
	Inferring trust.....	82
	Network-based inference.....	83
	Similarity-based trust inference.....	85
	Exercises.....	86
CHAPTER 7	Understanding Structure Through User Attributes and Behavior.....	91
	Analyzing attributes and behavior.....	95
	Analyzing content.....	96
	Example analysis.....	97

	Case study: Identifying user roles	98
	Exercises	102
CHAPTER 8	Building Networks	107
	Modeling networks	107
	Defining nodes	107
	Node selection	108
	Defining edges	109
	Examples	110
	Case study: The Enron email network	111
	Sampling methods	113
	Random sampling	114
	Snowball sampling	115
	Egocentric network analysis	117
	Exercises	120
CHAPTER 9	Entity Resolution and Link Prediction	125
	Link prediction	125
	Mathematical notation	128
	Computing score	129
	Advanced link prediction techniques	134
	Entity resolution	134
	Scoring techniques	136
	Incorporating network data	138
	More sophisticated entity resolution	139
	Link prediction: Case study—Friend recommendation	141
	Entity resolution: Case study—Finding duplicate accounts	143
	Conclusion	144
	Exercises	145
CHAPTER 10	Propagation in Networks	151
	Epidemic models	151
	Threshold models	152
	The firefighter problem	154
	Stochastic models	156
	Applications of epidemic models to social media	165
	Exercises	165
CHAPTER 11	Community-Maintained Resources	169
	Supporting technologies for community-maintained resources	169
	Wikis	170

	Message boards.....	170
	Repositories.....	171
	User motivations.....	171
	User Motivation—case study: Wikipedia.....	172
	Site maintenance—case study: Geocaching.....	174
	Maintenance.....	176
	Exercises.....	177
CHAPTER 12	Location-Based Social Interaction.....	179
	Location technology.....	179
	User-posted location data.....	179
	Estimating location data via IP address.....	179
	GPS location data.....	180
	Mobile location sharing.....	181
	Location-based social media analysis.....	182
	Location-based analysis of offline events.....	184
	Fires.....	184
	Crowdsourced crisis information.....	186
	Marketing.....	186
	Privacy and location-based social media.....	186
	Conclusions.....	187
	Exercises.....	188
CHAPTER 13	Social Information Filtering.....	191
	Social sharing and social filtering.....	191
	Automated recommender systems.....	192
	Traditional recommender systems.....	192
	Social recommender systems.....	194
	Case study: Reddit voting system.....	194
	Case study: Trust-based movie recommendations.....	196
	Conclusions.....	198
	Exercises.....	199
CHAPTER 14	Social Media in the Public Sector.....	203
	Analyzing public-sector social media.....	203
	Analyzing individual users.....	203
	Case study: Social media to solve an attempted child abduction.....	204
	Case study: Congressional use of twitter.....	206
	Case study: Predicting elections and astroturfing.....	209
	Exercises.....	211

CHAPTER 15	Business Use of Social Media	213
	Measuring success	213
	Broadcast example: Will it Blend? Marketing campaign	216
	Interaction and monitoring example: Zappos customer service	218
	Social media failure example: Celeb boutique and the NRA....	219
	Conclusions	220
	Exercises	220
CHAPTER 16	Privacy	223
	Privacy policies and settings	224
	Privacy settings	224
	Privacy policies	225
	Aggregation and data mining	229
	Deanonymization	229
	Inferring data	230
	Data mining	230
	Data ownership and maintaining privacy online	231
	Respecting privacy in social media analysis	232
	Exercises	234
CHAPTER 17	Case Study: Social Network Strategies for Surviving the Zombie Apocalypse	237
	Introduction	237
	The zombies are coming	237
	Related work and background of the zombie apocalypse	237
	Network strategies for the individual: Avoiding infection	239
	Tie strength	239
	Network structure	240
	Network strategies for the government: Stopping the spread	241
	Network strategies for the individual: Obtaining information	243
	Network strategies for the government: Information sharing	244
	Exercises	246
	References	249
	Glossary	255
	Index	259
